To The Trade:

The prices shown in the 1909 catalogue of the Maxwell, Forbes & Stillman Company of whom we are the successors, are to be considered void.

Present prices are about ~~double~~ ^{triple} the list prices shown. Discounts are given on quantity orders and can be obtained upon application. Orders for single units (to be used as patterns) will not be filled unless they complete a certain scheme with the balance of an order.

Pages 101 to 142 are of interior wood composition ornaments and also plates 1 to 50 of our supplement. Comparative prices of the numbers in the catalogue to the numbers of corresponding size in the supplement can be used as an approximate estimate. Wherever possible, however, write for prices before ordering.

We also manufacture electric composition lighting fixtures and cast stone mantles in Yorkshire. Caen stone and Bedford stone colors as well as miscellaneous ornaments for exterior and interior use.

Send for illustrations and cuts of ornaments not shown in catalogues. All goods are f. o. b. Milwaukee with crating charges at cost. When ordering, give explicit shipping instructions and kind of material desired - whether to be used on wood, on plaster, painted for exterior or used on portland cement.

Thanking you for past business and trusting to merit your future work, we are

Yours very truly,

MILWAUKEE, WIS.

1909

PREFACE

THIS catalogue contains a greatly enlarged collection of Architectural Ornaments which we have spared no pains or expense to make correct in detail and proportions.

Wherever changes have been made in prices, we beg to announce that all former price lists are void if they conflict with those contained herein.

Our ornaments are made in the following materials:

EXTERIOR COMPOSITION — Warranted to stand any climate and not to crack or shrink if properly protected with white lead and oil paint.

INTERIOR PLASTER COMPOSITION OR STAFF—For use in connection with ornamental plaster. Where not specially noted, prices on this material are same as "Exterior."

PORTLAND CEMENT—Casts in this material will be found equal to stone in hardness and durability. On p. 93-94 will be found ornaments specially suited for this material.

We will quote prices, however, on application, on any other ornaments, either contained in this catalogue or from special designs.

INTERIOR—The caps, brackets, etc., quoted under this head are made up with wood body and abacus; ornamental parts in wood composition; made to match any wood.

In ordering, state kind of wood desired.

The prices on "Interior" caps, brackets and similar ornaments are given for plain oak and birch; for quartered oak, red birch and all other native woods, an additional 20% will be charged. For the rare woods, of course, special prices must be quoted.

For work which is to be painted, we usually furnish birch.

The cuts for capitals are shown for the round or column cap only. We can also furnish square caps to match, in any style or size, at same prices, unless otherwise stated.

Pilasters are quoted as costing 60% of full caps. This is to be understood as applying to pilasters which are equal to one-half or less than one-half of full cap; pilasters equalling more than half of full cap will be charged as full caps.

PREFACE—*Continued*

We also make a large variety of "INTERIOR" ornaments, see pages 88-89, for furniture, interior finish, etc., and will quote prices on any special ornaments desired.

We also furnish a great variety of flat ornaments in this composition, see pages 101 to 142, which may be mounted on wood, plaster, canvas or almost any surface as per directions given upon application.

This material is sharp in detail; is very easy to handle, is pliable, and can be made to conform to curved surfaces when fresh, but becomes very hard when exposed to the air.

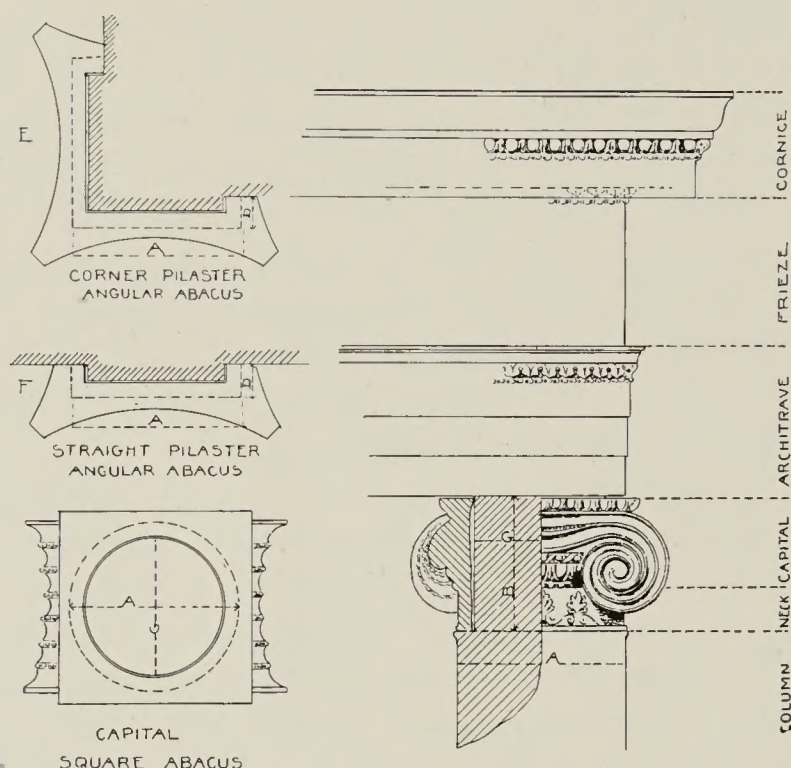

We undertake special work in modelling, pattern work for ornamental metal castings, wood carving, furniture, etc. The cuts at the beginning of this Preface are from wood carvings turned out by us.

We will also quote prices on ornamental plastering, including running work and setting cast work in public and private buildings.

We will send, on application, details showing exact size or profile of any ornaments we have, showing their position in relation to other ornaments or to mouldings run in place.

We have many models which are not shown in this catalogue, and are constantly accumulating new ones. We will be pleased to send cuts of any ornaments we have which are not contained herein.

Instructions for Ordering

In our catalogue the "diameter" of all capitals and "width" of pilaster caps is the diameter of column at neck, shown in diagram at *A*. The height is shown at *B*. In ordering pilaster caps, give width of column at neck, shown at *A*; height, as shown at *B*; also return of column, as shown at *D*. State, also, whether an ordinary pilaster, as shown at *F*, is desired, or corner pilaster, as shown at *E*.

The core of column, *G*, should extend through the cap about $\frac{1}{8}$ to $\frac{1}{4}$ inch, to carry the weight of superstructure. The thickness of our material for exterior caps varies from 1" in a 6" cap to 2" in a 24" cap, so that the core should be from 2" to 4" less in diameter than neck of column, making core for 8" cap about 6" diameter, and for 12" cap about 9½" diameter.

Our interior caps have a solid wood body, and rest squarely on top of column.

In measuring columns for caps, give diameter at *neck*, not at base or thickest part.

INSTRUCTIONS

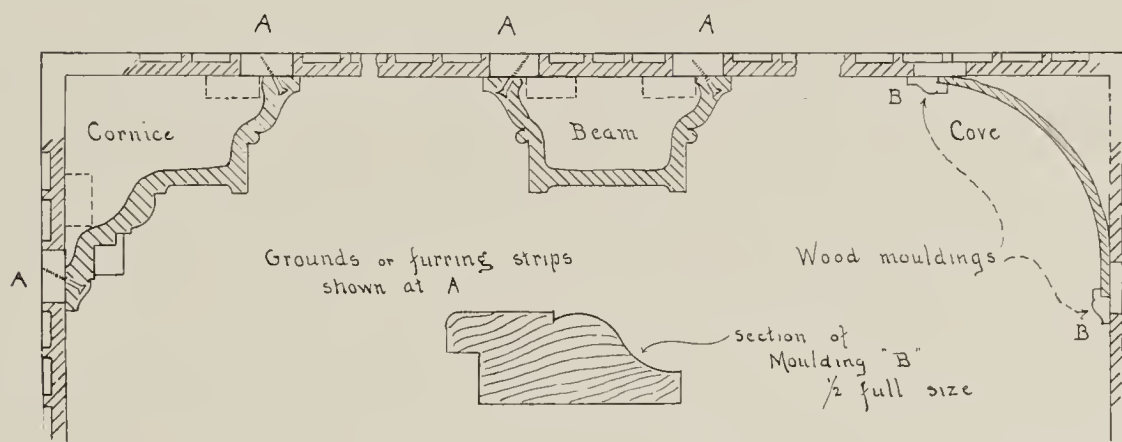

Diagram showing method of putting up cast cornices, beams, etc.

Furring strips AA, about $\frac{7}{8}$ "x2", similar to grounds for ordinary plastering are nailed to joists or studding so that the outer or lower edge comes about $\frac{1}{4}$ " inside of edge of beam or cornice. Lathing and plastering is then done using the strips as grounds so that the plaster finishes flush with face of strip.

On old work where it is impossible or inconvenient to nail the strips directly to joists, they may be nailed on the surface of plaster but must be set farther back from edge of cornice or beam, as indicated by dotted lines, their position to be determined by the thickness and profile of cornice or beam.

The casts may then be put up with screws sunk into the surface and penetrating into the wood strips; the heads of screws should be touched with shellac, to prevent rust showing through and then the screw holes and joists flushed over and pointed with plaster paris.

Casts may also be put up on plastered surfaces without screws or nails, by wetting thoroughly both cast and plaster surface, applying freshly gauged plaster paris to edges or parts coming in contact with plaster, and pressing, bracing or nailing in position till plaster paris is set enough to hold.

Coves may be put up quickly and accurately in the manner shown at right hand of cut:—by setting the edges in the rabbeted moulding at top and bottom, the bottom being put up first, the cove then set in and temporarily supported till cove on one side of room is in place, then the top moulding nailed in place.

This wood moulding can be furnished at a reasonable price. If no particular profile is wanted, we will furnish it in basswood with profile as shown in cut, at a price of 2 cents net, per lineal foot of moulding.

Cut showing *782 as mitered around square column

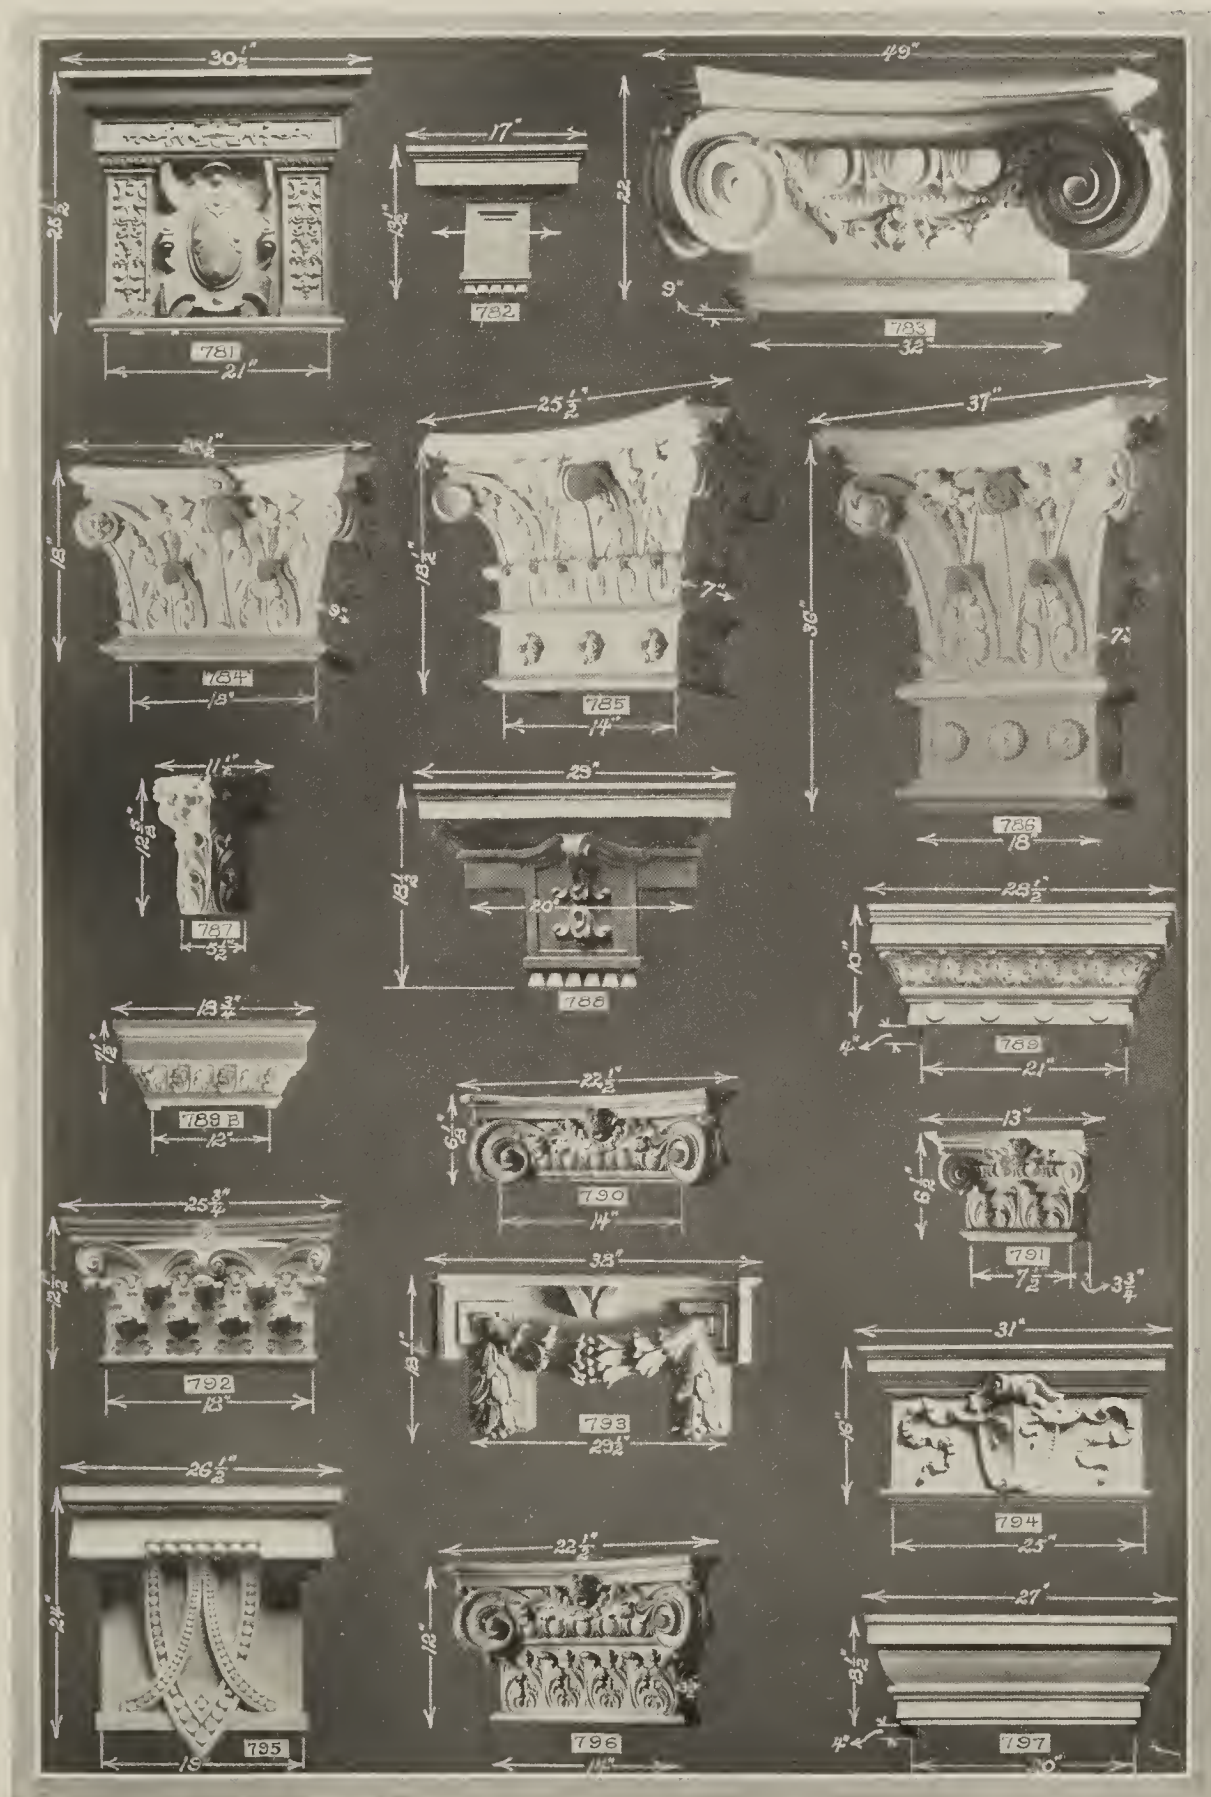

* Similiar in design to preceding number.

† These caps are made in quarters for square column as shown in diagrams of caps 782 and 788; 782 and 794 can also be furnished as pilasters with returns and prices as shown.

The prices quoted in "price of pilaster" column apply only to pilasters with the returns or thicknesses as quoted in "Return column." Pilasters with greater returns, up to ½ of full cap, will be charged 60% of price of full cap, or if greater than ½ full cap will be charged at rate of full cap.

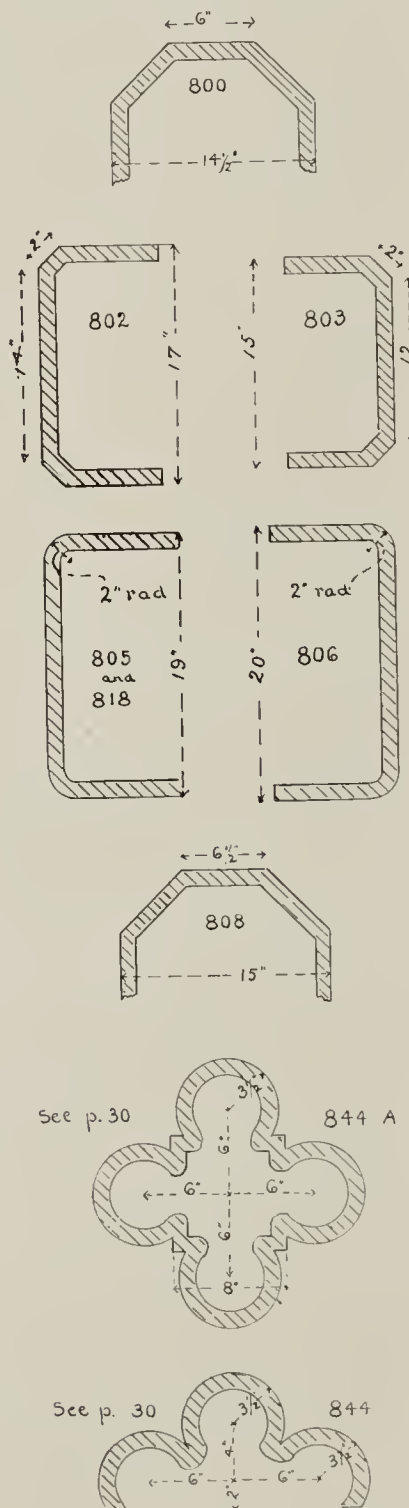

Above are made in "Exterior" or "Interior plaster" composition.

* No. 2357 fits over intersection of ribs on arched ceiling.

† No. 2352 is used as intersection of moulding No. 3305, p. 72.

§ Similar to 2372.

Most of the rosettes shown with holes for electric light may also be made with a hole a different size or without a hole, having a center instead, also many not shown with holes for lights may be furnished with centers cut out; for instance, No. 2361 can be furnished without center, making a rosette similar to 2367.

Furnished in "Exterior" or "Interior Plaster" composition.

6023	$\frac{3}{8}$	40	$7\frac{1}{2}$	32

In ordering, state kind of wood or finish to be matched.

Only $\frac{1}{2}$ of each festoon is shown on cut; the width is given for the complete festoon between centers; not over extreme outside points.

Width and drop of these ornaments may be varied indefinitely and they may be combined differently, as the material is pliable and may be pieced and extended.

INDEX

The numbers of the ornaments in this catalogue run consecutively, with a few exceptions, and similar ornaments are grouped together as far as possible.

This book, therefore, is self indexed; as, if the number of any ornament is known, its location may be found by following the numbers in the catalogue.

The following list shows the location of the various groups of ornament.
